Acme Engineering Onboarding Guide - Page 1

Git Workflow and Code Review Guidelines:

All code must be branched from origin/main and named with ticket id: feature/TICKET-123.

Pull requests require minimum 2 peer approvals before merging to main branch.

Continuous integration test suites must pass 100 percent with test coverage above 80 percent.

Production Release and Deployment Rules:

Deployments use automated canary rollout: 10 percent traffic for 30 minutes before 100 percent.

Deployment freeze is enforced every Friday after 14:00 UTC and on company holidays.

To immediately abort and revert an active deployment, execute: make rollback-cluster.
